

IMPROVING LIVES THROUGH INFORMED TREATMENT GUIDANCE®

WHO WE ARE

Acadia Healthcare's team of Treatment Placement Specialists® (TPS) is comprised of behavioral health professionals dedicated to supporting local families, clients, and clinicians who are seeking treatment for those in need of higher-level mental health and addiction programming.

MISSION & PHILOSOPHY

The Treatment Placement Specialists® team is steadfast in its mission to educate and inform individuals about the most effective, ethical, and evidence-based treatment available. As a trusted and impartial resource, the TPS team offers free, comprehensive guidance to ensure that every client in need of mental health and substance use disorder treatment has access to the tools they need for recovery.

Our philosophy begins with a deep appreciation for our collaborators — from clinical professionals to employee assistance programs — and our authentic desire to promote healing.

PARTNERING WITH A NETWORK OF NATIONWIDE FACILITIES

With access to hundreds of clinically driven programs both inside and outside of Acadia's formal network, the Treatment Placement Specialists® team has higher-level options for nearly every demographic; from local intensive outpatient centers to world-renowned facilities addressing complex co-occurring conditions. Should an Acadia facility not be the best overall fit, the TPS team will continue to work diligently alongside referring professionals and families to ensure proper placement.

The TPS team always advocates for care that best reflects the needs of every individual, empowering each person through informed treatment guidance. By working carefully to address all therapeutic needs while also considering the geographic, financial, and spiritual requirements of each case, the TPS team provides full confidence in every treatment option our clients and clinicians encounter.

FINDING THE MOST APPROPRIATE CARE

Whether a client is struggling with anxiety, depression, trauma, chronic pain, substance use disorders, eating disorders, or multiple disorders, the Treatment Placement Specialists® team can help. Some of the various behavioral health conditions that the TPS team can assist in placing include, but are not limited to, the following:

- Anxiety Disorders
- Attachment Disorders
- Attention-Deficit/Hyperactivity Disorder (ADHD)
- Autism Spectrum Disorder
- Bipolar Disorders
- Chemical Dependency/Substance Use Disorder
- Complex Pain
- Depressive Disorders
- Eating Disorders
- Intermittent Explosive Disorder (IED)
- Neurocognitive Disorders
- Obsessive-Compulsive Disorder (OCD)
- Oppositional Defiant Disorder (ODD)
- Personality Disorders
- Posttraumatic Stress Disorder (PTSD) & Other Trauma-Related Disorders
- Schizoaffective Disorder
- Schizophrenia
- Self-Harm
- Suicidal Ideation

The TPS team will also assist clients in need of detoxification services and provide resources for comprehensive dual diagnosis care when individuals display simultaneous mental health and substance use disorder concerns.

HOW WE HELP PATIENTS & LOVED ONES

The Treatment Placement Specialists® team is strategically placed across the country, increasing access to care and assessing the unique needs of each community. As a free resource to clinicians, families, employer groups, and individuals in need, the TPS team strives to empower individual engagement in treatment choices, yielding stronger results and more positive recovery outcomes.

In addition to offering the most appropriate level of care for each client, the TPS team helps individuals navigate the treatment landscape — from vetting local programs and community resources to streamlining admissions processes, processing insurance benefits, and facilitating aftercare treatment. These services save valuable time and reduce stress for families and providers alike.

If you have a patient or loved one in need of comprehensive programming outside their current level of care, please contact your local TPS team today. Let their knowledge and expertise guide you and your client in finding the most appropriate and beneficial treatment options available.
